(Remedial) - written commitment to produce comments to DRAFT
AOC and SOW for RI/FS

Dear Counsels: According to conversations that I have had with you during the past week, Counsel for Blue Tee has agreed to produce comments (legal and technical) on the Draft Administrative Order on Consent (AOC) and Statement of Work (SOW) for a Remedial Investigation and Feasibility Study (RI/FS) at the above referenced Site. Counsel for GSA has also indicated a commitment to produce any comments that US DOJ-Def may have on the same documents. Blue Tee has agreed to get comments to US EPA by Monday, July 29, 2002. US EPA would request that DOJ-Def Counsel also try to meet a similar time frame. After US EPA has received these comments and considered them, we will be prepared to meet with all concerned PRPs in a formal setting and to move forward with negotiations on the Site. It would be advisable for Counsel for XTRA Intermodal to prepare and submit any comments that this PRP may have, as soon as is possible as well, since US EPA plans to proceed with full settlement negotiations in a timely manner.

Please contact me with any comments or questions at 312/886-6613 or by e-mail.

Tom Turner, US EPA, ORC, Region 5
